

HUMIDITY SEPARATOR AND STRAINER SF251/S PN16 – PN40

DESCRIPTION

The SF251/S series centrifugal separators remove moisture from steam and compressed air pipelines. Steam and compressed air pass through the separator and, as a result of centrifugal forces, impact and swirling effects, the particles with a heavier specific gravity, such as water and oil droplets, moisture in suspension, dirt and scale are separated from the fluid.

The condensate collected at the bottom of the separator must be automatically drained by a suitable steam or compressed air trap.

MAIN FEATURES

Several possibilities of installation. No moving parts. Stainless steel strainer screen included

| OPTIONS: | Condensate threaded connection. Special tailor made designs. | | | | | | | |
|----------------------|--|--|--|--|--|--|--|--|
| USE: | Steam, compressed air and other gases (Group 2). | | | | | | | |
| AVAILABLE MODELS: | SF251/S – carbon steel body. | | | | | | | |
| SIZES: | DN 15 to DN 100. | | | | | | | |
| PIPE CONNECTIONS: | Flanged EN1092-1 PN16 / PN40. Flanged ANSI Class 150 lb / 300 lb. Female screwed BSP or NPT on request. | | | | | | | |
| INSTALLATION: | Always with the condensate discharge pointing downwards. See IMI – Installation and maintenance instructions. | | | | | | | |
| HOW TO SELECT: | Generally, in an existing plant, it is advisable to fit a separator with the same size as the pipeline. Pressure drop is normally negligible. For approximate pressure drop calculation please consult factory. | | | | | | | |

| CE MARKING – GROUP 2 (PED – European Directive) | | | | | | | | |

* For certified values, consult factory. Weight and volume refer to PN16 design. Other ratings may have slightly different values. ** G and F connections can be supplied threaded or flanged.

Remarks: The top of the separator is supplied with a threaded connection which size does not exceed the size of the drain connection. This connection is always supplied with a threaded socket. It can be used for air venting or balance pipe connection.
